**MEDIUM
RISK**

COVID-19 RTK-Ag self-test immediately, if RTK-Ag result is negative continue to work with strict adherence to the SOP.*

Continue to work with strict adherence to the SOP.

COVID-19 patients include patients in wards and clinics, and other health workers who have a positive COVID-19 test.

- * Asymptomatic healthcare worker within 90 days post COVID-19 infection can continue to work without restrictions and does not require testing.
- All RTK Ag self-test is to be purchased by the healthcare worker on their own.
- For healthcare worker with **worsening symptoms and COVID-19 RTK-Ag self-test negative** is advice to go to the Special Staff Health Clinic during office hours or to Trauma and Emergency Department after office hours for assessment.
- All healthcare workers must complete the Entry Visa daily before entering into University Malaya Medical Centre.
- For healthcare worker with a **positive COVID-19 RTK-Ag test**, they need to update their status on the MySejahtera App and follow the instruction on the App. They need to also inform their Head of Department or Supervisor of the positive test. There will not be a need to have a confirmatory RT-PCR test at SSC or Trauma and Emergency Department.
- For healthcare worker who is High Risk without symptoms are adviced to use N95, KN95 or KF94 masks while at work.
- All healthcare workers must continue to adhere to strict SOP while in University Malaya Medical Centre.
